PAO-Oil 68

For servicing passenger car and lorry A/C systems the repair shops have to keep a multitude of different oils in stock. This consumes storage space, tie up capital, and results in unusable oil supplies over time !

This high-quality, compatible multiple range synthetic oil has been developed for universal use in all lorry and passenger car A/S systems. It improves the performance of the air-conditioning system and is recommended by leading motor vehicle and parts manufactures.

PAO-Oil 68 is suitable for all refrigerant types and does not accumulate in evaporators and condensers, which result in a reduction of the cooling performance when other types of oils are used.

PAO-Oil builds up a thin film on the surface online and component walls, thus ensuring that the remaining oil is collected in the compressor to guarantee lubrication in the compressor. A result of this is enhanced low-noise operation.

PAO-Oil and retrofit

When retrofitting from R12 to R134a refrigerant the compressor does not have to be removed to completely drain the compressor oil. It is sufficient to suck out or drain the oil.

10 Clear Advantages of PAO-Oil 68:

1. Not hygroscopic* (does not absorb moisture).
2. Compatible with all other lubricants.
3. Suitable for all types of refrigerants.
4. No collection in evaporators or condensers.
5. Higher refrigeration capacity with lower energy requirement.
6. Reduction of noise level.
7. Wide operation range from -68° C to +315°C.
8. Practical reliability: PAO-Oil has proved itself for many years in all climatic zones.
9. Environmentally compatible.
10. No damaging effects on paintwork - no injury for users.

* This product does not attract moisture and can be stored and used for a long period even after opening.

PAO-Oil 68

For all passenger cars and lorries
(depending on compressor type of the vehicle A/C system).
Ideal for retrofitting from R12 to 134a.
Compatible with all other lubricants
(not for rotary vane compressors -> use Cargo 250304 for these).
For transport cooling equipment that is operated with refrigerant R500, R22, R134a or R507 and reciprocating piston compressors.
